We are delighted to welcome you to our practice and thank you for choosing us as your dental team. Our goal is to help you maintain healthy teeth and gums throughout your lifetime.

Here at TCB Dental Care, LLC, our primary concern is your health. Therefore, we adhere to strict sterilization methods. Also, we do not use amalgam filling materials, and also do not make all-metal crowns (caps) unless a patient requests them. Amalgams and metal crowns (except pure gold) contain metals such as mercury, nickel and chromium, which are known health hazards. We use non-metallic fillings that, in some instances, are not fully covered by insurance companies.

We will try our best to calculate your insurance coverage before treatment begins. Dental insurance is not designed to pay all the cost of treatment, but rather to be partial aid. Your estimated portion of the fees will be computed at the time of your appointment and this amount is due at the completion of that appointment. Please understand this is just an estimate. It may differ slightly from the actual payment that the insurance company is willing to pay. If the insurance payment varies from the estimated computed amount, an adjustment will be made either credit or debit, to your account. Again, we will make every effort to calculate your insurance, but ultimately, it is the insurance company that will determine the level of benefits to you.

We value our relationship with patients and strive to give each patient the best dental care. Thank you for selecting our offices to serve you.
